Ana Moldovan

Technical Analyst / Junior Developer

Email: ana.moldovan@example.com | Phone: +40 700 111 011 | Location: Groningen, Netherlands

Summary:

Biomedical Engineering student with strong analytical background and practical experience using Python, MATLAB, image processing, statistics, and data visualization. Partial fit for software and data roles, with limited professional web development experience.

Education:

Bachelor's Degree in Biomedical Engineering

University of Groningen

Expected Graduation: 2027

Projects:

Medical Image Processing Notebook:

- Used Python, OpenCV, NumPy, and matplotlib to process grayscale biomedical images.
- Applied histogram equalization, convolution filters, edge detection, and segmentation.
- Compared image quality using PSNR and SSIM.

Signal Analysis Project:

- Used MATLAB and Python to analyze biomedical signals.
- Applied filtering, frequency analysis, and visualization.

Technical Skills:

- Python
- MATLAB
- NumPy
- OpenCV
- matplotlib
- pandas basics
- Statistics
- Image processing
- Signal processing
- Jupyter Notebook
- Git basics

Soft Skills:

- Scientific reasoning
- Attention to detail
- Problem-solving
- Team collaboration
- Report writing

Limitations:

- Limited React experience
- Limited backend web development experience

- No professional Django or Angular experience
