Maria Popescu

Full Stack Engineer Intern

Email: maria.popescu@example.com | Phone: +40 700 111 002 | Location: Cluj-Napoca, Romania

Summary:

Computer Science undergraduate with strong interest in full-stack engineering. Basic experience with Java, JavaScript, HTML, CSS, REST APIs, object-oriented programming, debugging, and unit testing. Interested in building scalable web applications and learning modern engineering practices in an Agile team.

Education:

Bachelor of Science in Computer Science

Babes-Bolyai University, Cluj-Napoca

Expected Graduation: 2027

Technical Skills:

- Programming Languages: Java, JavaScript, Python basics
- Web: HTML, CSS, HTTP, REST APIs
- Frontend: React basics, Vue basics
- Backend: Java Spring Boot basics, Node.js basics
- Testing: JUnit basics, unit testing, integration testing concepts
- Tools: Git, GitHub, IntelliJ IDEA, VS Code
- Concepts: OOP, debugging, clean code, Agile development

Projects:

Sports Score Tracker:

- Built a small web application for tracking football match scores.
- Implemented frontend pages using HTML, CSS, and JavaScript.
- Created backend endpoints in Java Spring Boot.
- Practiced REST API integration and JSON data handling.

Library Management App:

- Designed classes using object-oriented programming principles.
- Added CRUD operations for books, users, and loans.
- Wrote basic JUnit tests for service methods.

Experience:

Teaching Assistant Volunteer

University Programming Lab, 2025

- Helped first-year students understand Java basics, loops, classes, and debugging.
- Reviewed small assignments and gave feedback.

Soft Skills:

- Strong reasoning ability
- Team spirit
- Responsible and reliable
- Good written and spoken English
- Willingness to learn quickly
